新鲜原燕盏

Freshly Raw Bird Nest

刚采摘的原燕盏，保留天然纤维与原始状态。

Freshly harvested raw nests before cleaning, showing natural fibers and original condition.

干挑工艺/Dry Picked Method

天然轻毛象牙白/米白原料

Light Feather Raw Bird's Nest (干挑)

精选天然轻毛原料，羽毛较少，呈天然象牙白、米白色泽。由于优质米白与轻毛原料产量较低，比中毛及重毛原料更稀缺，因此市场价值更高。**优质燕窝，始于优质原料。**

Selected from naturally light-feather raw nests with a natural ivory-white color and more complete nest shape. Premium ivory-white, light-feather raw materials have lower production yield and are more scarce than medium or heavy-feather raw nests, which results in higher market value.

Premium bird's nest begins with premium raw material.

干挑燕窝

Dry-Picked Bird's Nest (干挑)

干挑采用人工挑毛方式，更好保留燕窝天然纤维结构与原盏形态。*Manually cleaned. Preserves natural fiber structure and original nest shape.*

湿挑工艺/Wet Picked Method

中毛/重毛原料

Medium/Heavy feather Bird's Raw Nest

采用中毛或重毛原料，因羽毛含量较高，需要浸泡软化后进行深度清洁。

Produced from raw nests with heavier feather content that require soaking for deeper feather removal

湿挑燕窝

Wet-Picked Bird's Nest (湿挑)

湿挑是先浸泡软化杂质后再清理，通过模具定型，使外观更加统一整齐。*After cleaning, nests are reshaped using molds for a more uniform appearance, this is why wet-clean nest often have highly consistent size and shape.*

天然洞燕 / Natural Cave Nests

未清洗沙巴天然洞燕

Sabah Raw Cave Nest

来自沙巴的天然洞燕，未经清洗，保留原始状态。

Wild-harvested cave nests from Sabah in natural uncleaned condition before further processing.

沙巴天然洞燕

Sabah Natural Cave Nest

Cleaned natural cave nests sourced from Sabah, Known for thicker fibers and stronger texture.

天然金黄色泽，纤维明显，属于高端洞燕产品。

Naturally golden tone with dense fibers and limited harvest supply

砂拉越天然白洞燕片

Sarawak White Cave Nest (白洞燕)

颜色较浅，纤维细致，适合高端零售分装市场。
